

# Wayply Domestic Maple

## Overview

The Wayply Domestic Maple is designed to fit among the best-known plywood in the market. Our US face veneers display the traditional visual standard you are looking for, with a superior performance against scratches. The real  $\frac{3}{4}$ " panels match for standards of machinery and projects when used along other high graded plywood. The core has a combination of softwood and hardwood, making it stronger and laying it flat. As a plus compared to others, it is Termite Treated and zero-Formaldehyde, to bring your projects to the highest standards.

## Common Applications

Cabinets

Drawer Sides

Furniture

Interior Decor

## Construction

Face: 0.6mm Domestic Maple  
 Core: Veneers of Pine and Eucalyptus  
 Back: 0.6mm Domestic Maple
